## 2.3 TECHNIQUES OF SEO

- **WHITE - HAT SEO**

- White hat seo is a good method / techniques for achieving good ranking for website or webpage.
- This technique includes providing a quality content which is related to your website.
- Search engine recommends this technique as a part of good design.
- This method creates quality content that people actively want to read and share.
- When this method is used then the website take some time to rank on particular keyword but your ranking safe for many years.
- This techniques follows all the search engine guidelines and protocols

## BLACK - HAT SEO

- 1] It is a technique that search engines do not approve
- 2 ] This technique does not follows all the search engine guidelines and rules.
- 3] Black hat seo means a technique in which illegal methods are used to rank the website on top without following the protocol of the search engine.
- 4] This method is called as short term success way for increased traffic

**Refer the following strategies and differences in short about Black Hat and White Hat techniques—**

# WHITE HAT

## WHITE HAT STRATEGIES

- Relevant content
- Well-labeled images
- Relevant links and references
- Complete sentences with good spelling and grammar
- Standard-compliant HTML
- Unique and relevant page titles

# BLACK HAT

## BLACK HAT STRATEGIES

- Duplicate content
- Invisible text and stuffed keyword
- Cloaking or re-directing the user to another site or page
- Links from sites with non-relevant content

# WHITE HAT STRATEGIES

- 1.Prioritize Quality Content :-** content on your website is one of the most significant ranking factors within search engines.
- 2.Well Labeled Images:** refers to use informative alt text to tell Web site viewers the nature or contents of an image.
- 3.Relevant text & references** -The intention here Linking to relevant websites will increase your credibility.
- 4.Complete sentence with good grammar :-** Content must be meaningful understandable to user.
- 5.Standard compliant HTML :-** Use CSS define the layout, colors, and fonts of a web page.
- 6.Unique & relevant HTML title: Search engine** believes in originally created content .

# BLACK HAT STRATEGIES

- **Duplicate Content:** This is one of the techniques where content from one page is simply copied by the website owner onto his own website. Google is strictly against this practice and believes in originally created content.
- **Keyword stuffing:-** refers to the practice of filling your content with irrelevant keywords in an attempt to manipulate where the page ranks on search results pages.
- **Invisible Text:-** The intention here is to match the text color to the color of the background. By doing so, website owners hide their keywords from users but make it visible to the Google search engine.
- **Cloaking or Incorrect Re-directs :-** Content viewed by user is different from that search engines.
- **Links from sites with non relevant Contents:-** Linking to non-relevant websites will decrease your credibility, then your page might be incorrectly categorized.

## 2.4 OPTIMIZING WEBSITE

### 1. SEO : Page structure optimization

- Html programs should start with `<!doctype html>`.
- If it is singular tag eg . `<img>` it should be self enclosed like this- `<img />`
- Order of tags should be proper. Most of the time recently opened tag will be closed first.

#### ○ It is recommended to use

1. **<TITLE>** : Title is the first thing that user notices in search result list while using Google for searching. Contents should be up to 60 characters (spaces included).

2. **Meta-description Tag** : While creating a web page, Meta description should be your used to boost On-Page SEO. Meta Description should be between 70 and 160 characters (spaces included)

3. **Heading Tags** : The page should include proper heading tags from `<h1>` to `<h6>`

4. **Image Tag with ALT attribute** : The alt attribute gives information about image the does not download, it can make the understand the image, image related viewers information

## Example of Page structure optimization

```
<!doctype html>
<html>
  <head>
    <title>structure with page opening and appropriate order</title>
  </head>
  <body>
    <h1> Let us understand SEO</h1>
    <p> Webpage optimization helps for higher ranking in search engines.
      <b> There are number of ways to optimize the pages
        <i> Even the Social media plays an important role!!!
      </b>
    </p>
  </body>
</html>
```

[Click here to here](#)

- **Note :** In the above example check the ordering of <p>,<b>and<i>. The innermost tag ends first, followed by the outermost tag. The other basic tags also follow a proper ordering as per the HTML structure.

```
<!doctype html>
```

```
<html>
```

```
<head>
```

```
<title> Meta tag and Image tag </title>
```

```
<meta name = "description" content = "statue of liberty">
```

```
<meta name = "keywords" content = "alt, optimization of image">
```

```
<meta name="image" content= "Statue-of-Liberty">
```

```
</head>
```

```
< body>
```

```
<h1> Let us understand Meta and Image for optimization </h1>
```

```
<p>
```

```

```

```
</p>
```

```
</body>
```

```
</html>
```

# SEO KEYWORDS

- SEO keywords are the important words and phrases related to the developed website content.
- A list of keywords. Need to be carefully chosen to optimize the search.
- Keyword Research and Analysis is an important part of the Search Engine Optimization (SEO) as well as "Search Engine Marketing".
- For "Search Engine Marketing", one can pay for certain keywords. Ex. Google AdWords Keyword Planner

### 3. SEO SOCIAL BOOKMARKING

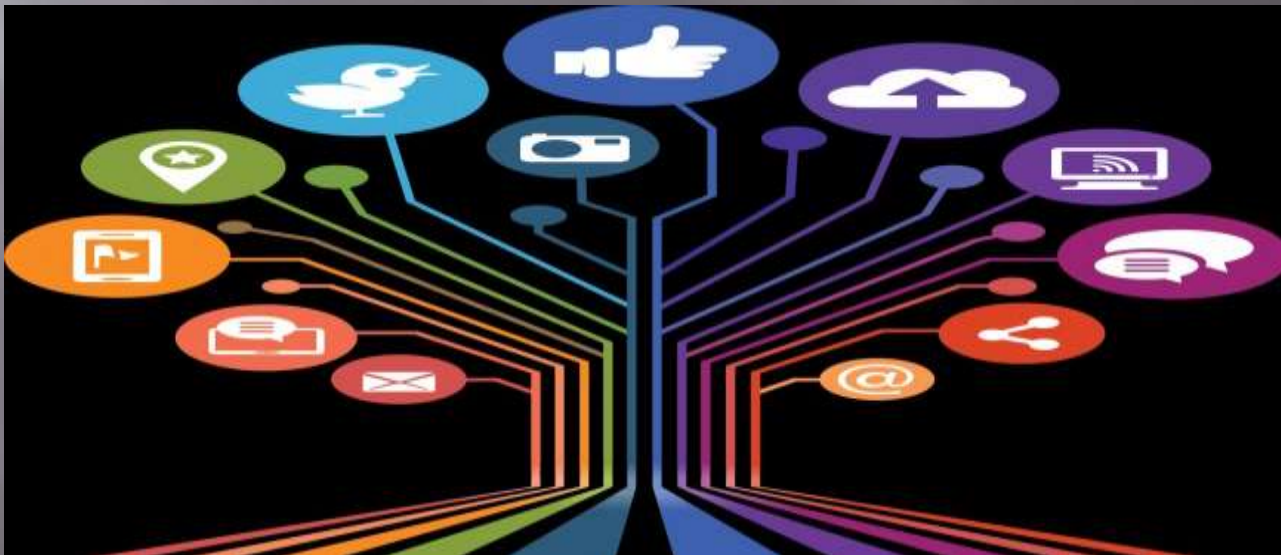

- It is very useful for Off-Page SEO optimization.
- **Bookmarks are website links that are stored for future references. They are very useful specially when Web pages with long URLs are not easy to remember.**
- Bookmarking service allows you to save, organize and share bookmarks with other users.
- External links are the important SEO factors to rank a website higher in the search engine.
- **With Social bookmarking, you can quickly create high-quality backlinks.**

## 4. SEO-SOCIAL MEDIA OPTIMIZATION (SMO)

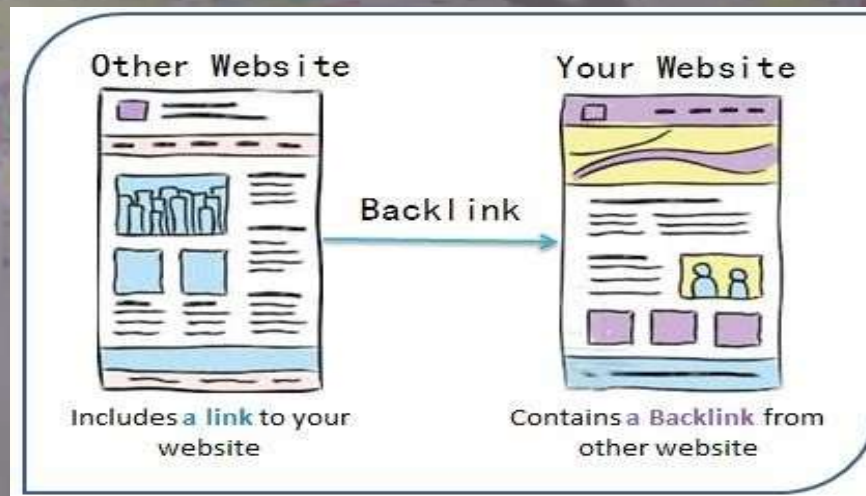

- It deals with enhancing the website's ranking, using interactive communities like Facebook, twitter, blogs, forums and so on.
- When these communities have links to the created website it builds familiarity and trust about the website.

## 5. SEO-BACKLINKS

- Backlinks are links on one website that, when clicked, take the user to another site.
- They also represent a "vote of confidence" from one site to another
- Backlinks are especially valuable for SEO because they contribute to the overall strength and value of the content.
- Backlinks to your website are a signal to search engines that others are interested to know about the contents from your website.

## OTHER FACTORS FOR SEO:-

- **Speed of the website** : While creating a website, attention is given on the design, content and as many visuals as possible. However, all But this can slow down the website and obstruct usability.
- **Mobile friendly** : to ensure that the created website is mobile friendly 'for maximum' exposure and to improve the websites ranking.
- **Creating robots.txt** : This file tells search engine **which pages you exclude from indexing**. For example, if you do not want a certain page or image being indexed, then you can restrict that page from being indexed.

## 2.5 SEO AUDIT

- An SEO Audit helps to find out what could be done to improve ranking on search engines, so that consumers could find the website with greater simplicity. It analyses the websites health Eg -Seomator, SEOptimer are few free SEO audit tools available on net.
- SEOptimer is a free SEO Audit Tool that will perform a detailed SEO Analysis. It provides clear and actionable recommendations that can be taken to improve your online presence.
