Good Morning Everybody! I am participant no 33 and I from stream commence. so today I am here to speak about e-books and paper books. From Ancient times, books were written in paper. The Mahabharata, The Ramayana, The Bible etc are the books which were known till today and also in future. A book is a physical book that has the text images printed on paper. The pages are bound together and the book has either a hard cover or a softcover. But nowadays student prefer ebooks rather than paper books. or we can say that they are day by day hustling mother knowledge. paper books Increases self-confidence, Memory and it also Reduces stress and tension. on the other hand e-book is full electronic book, digital file containing a body of text and images suitable for distributing electronically and displaying on screen in a manner similar to a printed book. Mostly both of them are similar to a printed book as they are source of reading but there are some differences such as paper books are printed on paper that is made from wood of trees. But ebooks are in digital form not requiring paper. You can touch and hold books in your hand and even

smell the new book. you can only get to see and not touch books in ebook format. You do not have to depend on the electricity to read a book. You can use any light source But you have to depend on the electricity to read an ebooks. At last we know to get that ebooks are more portable and lightweight. Instead of carrying multiple bulky books, one ebooks reader can hold thousands of ebooks. It saves a lot of space in your home and in your bag. It allows the user to store plenty of ebooks on the device, way more than anyone can read in their lifetime. The Main aim of ebooks are to simplify and enhance the overall learning experience. Digital Books make the learning process more interactive and engaging. Instead of listening to one person continuously talking, students can now actively participate in the learning process. In the years to come ebook will be more in use because, ebook cost much less than printed books because there is no paper printed. For one printed book, you can get up to 10 ebooks! besides ebooks can't be destroyed and harmed easily like printed books made of paper.

Thankyou!
